

If you are using XAMPP, then just start it from command prompt and add the below line in the command c:\xampp\php\php.exe -S localhost:8080 and voila. I guess the issue will get resolved. Acute myocardial infarction and disability after minor head injury. Because head injury has been implicated in the development of ischemic heart disease, we compared the development of acute myocardial infarction and disability after minor head injury with that after other orthopedic injuries. The design was a population-based, case-control study. A nested case-control analysis of all subjects (N=8,355) admitted to a hospital with a diagnosis of major orthopedic injury was performed. Subjects with a history of chronic heart disease, heart failure, or coronary revascularization were excluded, leaving 1,108 cases (11.6%) with acute myocardial infarction and 1,926 controls (20.2%). Of those with acute myocardial infarction, 64.6% had their first event after head injury. At the time of the injury, 50.4% of the patients were in the middle of a medical crisis (in the emergency department), and 11.2% were severely intoxicated. A history of head injury (odds ratio [OR] 1.8, 95% confidence interval [CI] 1.3-2.6) and a history of chronic obstructive pulmonary disease (OR 3.7, 95% CI 2.2-6.2) were independent predictors of acute myocardial infarction after injury. Subjects with acute myocardial infarction were more likely to die in the hospital (OR 3.2, 95% CI 2.3-4.3), and they were less likely to be discharged home (OR 0.3, 95% CI 0.1-0.5) than were those without acute myocardial infarction. Acute myocardial infarction was an independent predictor of disability among head-injured subjects. Age, gender, medical crisis, chronic obstructive pulmonary disease, and, to a lesser extent, alcoholism were independent predictors of disability. Elderly patients, women, and those with chronic disease were more likely to have disability after minor head injury. 0 = . S u
